

Lucas Sproat

Address: Chicago, IL, USA
Phone number: 773-620-3461
Email address: lucassproat@aim.com

Profile

Software engineer with 4+ years of experience building and scaling backend systems using C#, .NET, and Azure. Experienced in microservices architecture, performance optimization, and cloud-based distributed systems supporting thousands of users. Focused on delivering reliable, scalable solutions and continuously improving system efficiency.

Work Experience

01/2026 – 05/2026	Software Engineer Hexaware Technologies • Played a key role in migrating the microservices platform to a new Azure tenant, standardizing environments and deployment configurations • Implemented and refined CI/CD pipelines and Azure-based deployment strategies to improve release consistency and reduce risk • Supported cloud optimization and modernization efforts, improving system scalability, performance, and resource efficiency
03/2023 – 01/2026	Software Engineer Figo Pet Insurance • Contributed to migration from legacy API to microservices architecture, improving scalability to support thousands of daily users and reducing service coupling • Improved application performance by 50%+ (hundreds of milliseconds reduction in latency) through backend enhancements and system optimizations • Collaborated on backend service development within an Azure-based distributed system handling high-volume traffic and growing user demand
02/2022 – 03/2023	Junior Software Engineer Figo Pet Insurance • Developed and enhanced an internal administrative tool used by customer service teams to manage customer, pet, and policy data • Implemented full-stack features using C# (.NET) and React, improving usability and reducing manual data reconciliation between systems • Leveraged Azure Service Bus and Azure Functions to improve asynchronous processing and system performance

Skills

C#	.NET	Microsoft Azure	CI/CD & DevOps
SQL	Redis	Microservices	React

Education

09/2017 – 11/2021 Chicago, IL	Computer Science Bachelor's Degree DePaul University
----------------------------------	---

Internships

06/2021 – 08/2021

Data Science Intern XSELL Technologies

- Built data processing and visualization pipelines in Python to convert structured CSV data into directed graphs
- Independently scoped, planned, and delivered a full project lifecycle within a 10-week internship

06/2019 – 08/2021

Software Engineer Intern ArkusNexus

- Diagnosed and resolved bugs in web and mobile applications, improving stability and user experience
- Implemented code changes based on user stories and QA-reported issues within an Agile development workflow
